

YEAR 11 ENGINEERING MOCK EXAM REVISION

Students have a full and free copy of the revision guide on the school shared area:

School shared>Technology>Engineering Year 10 2018>BTEC Engineering coursebook. This can be accessed from both school and home.

Topics students should focus their revision around include all elements of the revision guide starting from page 4 to 25.

Types of engineering products

Machining processes

Forming processes

Fabrication processes

Electrical processes

Scales of production

Modern production methods (robots etc)

Materials and their processing in engineering

New technologies in engineering

Sustainable engineered products (life cycles etc)

Minimising waste/Lean manufacturing

Renewable sources of energy in engineering

All of the above have been covered in class over recent months.

Please use both your independent notes and the printed revision guide I have provided you with to help you to prepare for the important mock exam.

[The results of this mock exam will give us a clear indication as to how you may perform in your actual on-line exam, therefore it is important that you revise thoroughly.](#)
