Revision List for GCSE Economics students

You will have 20 multiple choice questions at the start of the paper. These will be from a range of Y10 Economics concepts. Therefore, it is vital you have knowledge of all elements of the Y10 content.

You will then have 60 other marks from short answer questions (2 mark), calculation questions and 6-mark graph and long answer questions. For these you should focus on:

- Price
- Equilibrium
- Production
- Demand shift (reasons that would cause this)
- Economic groups
- Business sectors (primary, secondary, tertiary)
- Competition
- Economies of scale (internal and external)
- Interest rates
- Financial sector (including financial institutions)
- Labour market
- Supply and demand
- The basic economic problem
- Interdependent nature of the economic groups
- Productivity

You should use your exercise book from Year 10, as well as the revision book we created. I would recommend writing revision cards of key terms as well as focussing on structure of longer answer questions.

Evaluate (6)- 2 x PeCAn with a "However, this is not always the case" at the end of each paragraph and an overall decision

Analyse (6) - 2 x PeCAn

Graph/ Analyse (6)- draw a graph and 2 x PeCAn (based on the graph… "As you can see…"
