

BRIDGING PROJECT – Year 9 Design and Technology

D&T is about Product Design, designing innovative, original products which address solutions.

Imagine that you are a blind person having to navigate your way around a shopping centre.

I need you to design a product which would address this issue.

Your design will be drawn on A4 paper, will be coloured and annotated to describe each feature in detail.

In approximately 150/200 words, please also type what issues you feel the user would face doing this simple task without your device, and then you can report on just how much their lives are enhanced by using your product.

Be as creative and original as possible.

Create a product name for your design and also create a logo which would be used on the product itself and on posters as the user enters the shopping centre.

The project needs to be completed over the summer holidays and will be handed in upon your return to school in September.

Have a great holiday, Mr Marsh
